

Elimination Reactions by Jennings (original track)

Yo here were are with 14D
...some reaction chemistry
It's elimination time! And now we're goin in...

E1, ya got two steps...
Undisputable it's a natural fact
Ya got dissociation, and then deprotonation
All leadin up to an alkene formation
E2, now that's not quite the same
You need a strong base and an antiperiplane
All in one step you can see this happen
Eliminations, they're chemical reactions!
