

I Just Had Class by Alanna, Jacqueline, and Katherine

Have you ever been the leaving group in S_N1
Yea I have I dissociated in step 1
A polar solvent let me do it
It literally just happened
Having solvent attack makes the forward reaction

Never guess where I just came from, I attacked
That carbocation, Garg says it's a fact
Then that final H left, I said deprotonate
And I called it done after the third transition state

I just had class and it felt so good (felt so good)
Neil Garg called that kid out for his yawn maneuver
Chem 14D
