

“NBD (no big deal) Feat. Lfeatherz”

By Justin K., Han K, Peter N.

UCLA 14D, Neil Garg, HJP [Han, Justin, Peter].
LFeatherz you ready? (Yea) Aight, show em what you got brah.

While I'm listening to Garg in his 14D class
Substitution is one concept you need to know to pass
You got, SN2 with its back side attack
It's only one step so just chill and hit the hay sack
Halides, tosylates, the finest of the LG's
I won't pick fluoride, so don't test me
SN1, yeah it's three steps
But Garg's got you so just don't forget
We get dissociation, nuc attack, deprotonation
There's really no need for the complication
Study hard, NBD, have concentration
Reactions are all that we're facin'
