

“Errybody Doin’ O-Chem”
by Amir H. and Simon L.

Pre-meds organic chemistry can be very difficult to understand...

Yo, but I got Garg though!

SN2 first you gotta figure out who attacks who,

N attacks E, and then you

Draw curved arrows, break that bond right through

Backside attack, LG out and holla SHOO!

If the LG is OH man it ain’t no good,

Make it an acid is what you should,

By protonating with an H or you could

Add TsCl make tosylate under the hood!

Errybody in CS50 doin’ O-Chem!

(Errybody in CS50 doin’ O-Chem)

Errybody in CS50 doin’ O-Chem!

(Errybody in CS50 doin’ O-Chem)
