

“Chemistry Reactions”

by Catherine W., Anuvad V., Rebecca T.

Chemistry Reactions

Now let me welcome everybody to the midterm test

Better listen up if you wanna be the best

Vollhardt hits your table like a nuc to elect-

Trophile, that's the gist of S_N2 , don't forget

Backside attack, invert stereochemistry

Hash and wedge, be sure to draw them pretty

Tertiary carbons, that's an S_N1

Booze or water as the solvent, that's what makes it fun

First step, take it slow with dissociation

Nuc attack, followed by deprotonation

t-butyl bromide, that's your new best friend

Like Garg, hear him out, that's what we recommend
